Palms are a vital component of tropical rain forests worldwide, but are increasingly threatened with extinction. As part of the Garfield Weston-funded Global Tree Seed Bank project, a complete tree-of-life for all genera of palms will be completed and augmented with species-level sampling for the major Indo-Pacific tribe Areceae.

### Evolution and diversification of the palms and their seed ...

Since the publication of the first edition of Genera Palmarum in 1987, there has been an explosion of interest in this quintessentially tropical flowering plant family. Palms tend to attract attention, perhaps because of their recognisable rather simple growth form, their ecological and economic importance, or indeed simply because of their association with the exotic.
