MIG/MAG WELDING Flux cored wires Wires for MIG/MAG welding are usually solid. For carbon, carbon-manganese, high strength low alloy steels and stainless steels, flux cored wires can be used. These offer the advantages of higher welding speeds and easier control of fillet weld profiles. FerromaxxŽ Plus is the multi-purpose gas for welding ...

Welder™'s Handbook

The majority of MIG welding is done with a gas shield — carbon dioxide and argon/CO2 mixes are the most common. The gas bottle has a regulator or flowmeter to set the gas flow. There are many variables here, but a good rule of thumb for light-duty welding is to use about 20 cubic feet per hour of gas flow.
