International Health Regulations 2005

The purpose and scope of the International Health Regulations (2005) are “to prevent, protect against, control and provide a public health response to the international spread of disease in ways that are commensurate with and restricted to public health risks, and which avoid unnecessary interference with international traffic and trade”. Because the IHR (2005) are not limited to specific diseases but apply to new and ever- changing public health risks, they are intended to have long ...
