cardiovascular stress test using treadmill or bicycle exercise and electrocardiographic and blood pressure monitoring.

Pharmacological stress and the use of imaging modalities (radionuclide imaging, echocardiography) are beyond the scope of these guidelines.

ACC/AHA Guidelines for Exercise Testing

This simple test measures the maximal distance that patients can walk at their own pace in 6 minutes. The test assesses global functional capacity but does not provide specific information on the individual systems involved in exercise capacity (ie, cardiac, pulmonary, hematologic, musculoskeletal). Neither does it assess patient effort.
