## CONTENTS 1

### **Pillow (PIL Fork) Documentation**

PIL is the Python Imaging Library by Fredrik Lundh and Contributors. Pillow — Pillow (PIL Fork) 4.2.1 documentation. Although advanced image processing (face recognition, optical flow, etc.) like OpenCV can not be performed, simple image processing such as resizing (scaling), rotation, and trimming (partial cutout) can be performed.

## **Our Documentation | Python.org**

The Python Language Reference¶ This reference manual describes the syntax and “core semantics” of the language. It is terse, but attempts to be exact and complete. The semantics of non-essential built-in object types and of the built-in functions and modules are described in The Python Standard Library.

## **The Python Language Reference — Python 3.8.6rc1 documentation**

The pickle module implements binary protocols for serializing and de-serializing a Python object structure. “Pickling” is the process whereby a Python object hierarchy is converted into a byte stream, and “unpickling” is the inverse operation, whereby a byte stream (from a binary file or bytes-like object ) is converted back into an object hierarchy.

The color is given as a single value for single-band images, and a tuple for multi-band images (with one value for each band). In 1.1.4 and later, you can also use color names (see the ImageColor module documentation for details) If the color argument is omitted, the image is filled with zero (this usually corresponds to black). If the color is ...

### **The Image Module — Python 3.6.1 documentation**

Python-tesseract requires Python 2.7 or Python 3.5+ You will need the Python Imaging Library (PIL) (or the Pillow fork). Under Debian/Ubuntu, this is the package python-imaging or python3-imaging .
